A-03-003-17 **PKI Administrative Records**

Description: FBCA CAs

Records are PKI-unique administrative records that establish or support authentication by tying the user to a valid electronic credential and other administrative non-PKI records that are retained to attest to the reliability of the PKI transaction process. Included are policies and procedures planning records; stand-up configuration and validation records; operation records; audit and monitor records; and termination, consolidation, or reorganizing records. Policies and procedures planning records relate to defining and establishing PKI systems. Records relate to such activities as determining that a PKI should be established; creating project implementation plans; creating the certificate policy (CP), certification practice statement (CPS), and other key operating documents; developing procedures in accordance with the CP and CPS; conducting risk analyses; developing records management policies (including migration strategies); and selecting the entity that will serve as registration authority (RA). Stand-up configuration and validation records relate to installing and validating both the Certification Authority (CA) and Registration Authority (RA), obtaining final approval or rejection from the agency's oversight or authorizing body, creating and generating a CA signature key, testing security procedures for the CA and RA, validating certification revocation procedures, and establishing back-up and storage for the PKI system. Operation records relate to the certification application; certificate issuance and key generation (including key pair generation and private key loading and storage of private keys and components of private keys); certificate acceptance, validation, revocation, suspension, replacement, and renewal; creating and maintaining an event log; and installing and validating software updates. Audit and monitor records relate to conducting periodic internal and external reviews of auditable events specified in the Federal Bridge Certification Authority (FBCA) X.509 Certificate Policy and other Entity CA policies, monitoring compliance with security requirements specified in the CPS and other operating procedures, investigating internal fraud or misconduct, and conducting internal and external audits of software and systems security. Termination, consolidation, or reorganization records relate to terminating, consolidating, or reorganizing a PKI; notifying subscribers of decisions, transferring inactive keys and revocation certificate lists to storage repositories, transferring consenting subscribers' and certificates and related materials to a new Certificate Authority, destroying sensitive records involving privacy (in accordance with an authorized records schedule), and shutting down and disposing of RA hardware and CA software.

Note: Select PKI administrative records serve as transaction records that must be retained as part of the trust documentation set with transaction-specific records. Agencies must determine which PKI administrative records are embedded with transaction-specific records as transaction records. These administrative records may vary from transaction-to-transaction.

Disposition: Temporary. Destroy/delete when 7 years 6 months, 10 years 6 months, or 20 years 6 months old, based on the maximum level of operation of the CA, or when no longer needed for business, whichever is later.

A-03-003-19 PKI Transaction-specific Records

Description: Records relate to transaction-specific records that are generated for each transaction using PKI digital signature technology. Records are embedded or referenced within the transaction stream and may be appended to the transaction content or information record. Along with PKI administrative and other administrative records, transaction-specific records are part of the PKI trust documentation set that establish or support the trustworthiness of a transaction. They may vary from transaction-to-transaction and agency-to-agency. When retained to support the authentication of an electronic transaction content record (information record), PKI digital signature transaction records are program records.

Note: Extreme care must be taken when applying the GRS-PKI to transaction records. Destruction of the transaction-specific and administrative records embedded in the transaction stream prior to the authorized retention of the information record that they access/protect will render the PKI incapable of performing what it is designed to do-protect and provide access to the information record. Due to the relative newness of PKI technology, both from an implementation and a litigation perspective, it is recommended that agencies identify all PKI transaction records (including PKI select administrative records embedded in the transaction stream and transaction-specific records) to be retained as part of the trust documentation for the records the PKI is designed to protect and or access and link the retention of the transaction records with that of the information record it protects/accesses. Transaction records must be retained as trust documentation set records together with the content/information record.

Disposition: Temporary. Destroy/delete when 7 years 6 months to 20 years 6 months old, based on the maximum level of operation of the appropriate CA and after the information record the PKI is designed to protect and/or access is destroyed according to an authorized schedule, or in the case of permanent records, when the record is transferred to NARA legal custody. Longer retention is authorized if the agency determines that transaction-specific PKI records are needed for a longer period.

- staff locators, unofficial organizational charts, and office seating charts (see Exclusion 1)

 - non-mission related management reviews and surveys
 - minutes of meetings related to administrative activities

Exclusion 1: This item does not apply to recordkeeping copies of organizational charts, functional statements, and related records that document the mission-related organization, staffing, and procedures of the office. Agencies must schedule those records on an agency-specific schedule.

The copies described here are Federal records if they are still being used by the agency for such business purposes, but are not recordkeeping copies of those records.

Note 2: For electronic mail records, the recordkeeping system must capture the names of sender and recipients, date (transmission data for recordkeeping purposes), and any receipt data, along with the message text. A-03-005-05 Intermediary Records

Description: Records of an intermediary nature, meaning that they are created or used in the process of creating a subsequent record. To qualify as an intermediary record, the record must also not be required to meet legal or fiscal obligations, or to initiate, sustain, evaluate, or provide evidence of decision-making. Records include:

- non-substantive working files: collected and created materials not coordinated or disseminated outside the unit of origin that do not contain information documenting significant policy development, action, or decision making. These working papers do not result directly in a final product or an approved finished report. Included are such materials as rough notes and calculations and preliminary drafts produced solely for proof reading or internal discussion, reference, or consultation, and associated transmittals, notes, reference, and background materials.
- audio and video recordings of meetings that have been fully transcribed or that were created explicitly for the purpose of creating detailed meeting minutes (once the minutes are created)
- dictation recordings
- input or source records, which agencies create in the routine process of creating, maintaining, updating, or using electronic information systems and which have no value beyond the input or output transaction:

 - electronic input source records such as transaction files or intermediate input/output files

Agencies must follow agency-specific schedules for these records. If the records are unscheduled, the agency must submit a schedule for them.

Exclusion 2: This item does not include the following data output files (agencies must follow agency-specific schedules for these records, except for the final bullet, which the GRS covers in another schedule):

- files created only for public access purposes
- summarized information from unscheduled electronic records or inaccessible permanent records
- data extracts produced by a process that results in the content of the file being significantly different from the source records. In other words, the process effectively creates a new database file significantly different from the original
- data extracts containing Personally Identifiable Information (PII). Such records require additional tracking and fall under GRS 4.2, item 130 (DAA-GRS-2013-0007-0012)

Note 1: An agency must submit a notification to NARA per 36 CFR 1225.24(a)(1)
