Subject: RE:

The Program would be Chairman Kerry to Lugar to WJC to Gates. Statements followed by questions from the Senators. They would expect nearly every Senator would attend if WJC confirmed. The topic of the hearing is "Building on Success: New Directions in Global Health" Also testifying after WJC / Gates would be a second panel of Second Panel: USAID Administrator Dr. Rajiv Shah and U.S. Global AIDS Coordinator, Ambassador Eric Goosby. They would like WJC to speak on the public / private partnerships, where the US and Intl Community is, the importance of our work Because bi-partisan coalition on HIV/AIDS is becoming increasingly fragile with the poor economy.

Goals of the hearing from the committee:

The objective of the hearing is to discuss the progress that has been made in global health and to ask where we should go from here. How do we build on remarkable but sometimes compartmentalized successes? Questions for consideration include:

What are the key opportunities and challenges?

In a constrained budget environment, how can public and private partners maximize the life-saving impact and cost effectiveness of health programs?

The United States has led the way in supporting path-breaking bilateral and multilateral HIV/AIDS programs. How can we best maintain and expand that work while creating a more holistic and integrated approach to global health?

What does it mean in practical terms to focus on women and girls and how can this approach yield new results?

Health systems are more than the sum of their parts. How can public and private partners most effectively help countries create the capacity to deliver health service

Committee Members

Subject:

Wjc will brief the senate foreign relations committee on wednesday at 10am with bill gates After an opening statement, he will answer questions from the senators

Needless to say, a great opportunity to talk about our work. He hasn't ever briefed in this capacity thus we need get to work and get him lots of info from all over, chai, gates people etc
