Subject: (Bloomberg) Kissinger hospitalized in Seoul

SEOUL (Bloomberg) Former Secretary of State Kissinger is in stable condition in a Seoul hospital after being taken there with abdominal pains at about 10 a.m. March 13. Kissinger was examined by doctors and is recovering according to a spokesman at Yonsei University's Severance Hospital in western Seoul. Results of the examination are not yet available, though the 86-year-old Kissinger is in no danger, the spokesman said. Kissinger came to Seoul to deliver a special lecture at a forum on North Korea's nuclear issue March 11 in Seoul. He also visited Cheong Wa Dae March 12 and discussed North Korea and East Asia's security order with South Korean President Lee Myung-bak.
