Subject: Quick Q/ Favor Mom

Hi Mom- I've a favor/ question for you (and really Secretary Gates). The USNS Comfort that is still here and has done amazing work- a combined mission of navy doctors, civilian doctors and military support staff as you know - its mission is still earthquake only related traumas and needs. Could we expand the mission for at least while its here to work on physical therapy and prosthetics for the trauma patients (a slight expansion)? The need is immense clearly and the ask not that far afield I think- and the Comfort doctors who are here want to help and have physical therapists and orthopedists back on the Comfort who could help (and aren't now because patients are being taken off once well enough to be so but before they could be fitted for a prosthetic if they had them on board). And how good would that be for our image and moral back home if we used some of the military knowhow on prosthetics to help people here (to help themselves and live with dignity). Admittedly the best solution for Port Au Prince or rural Haiti wouldn't be the same as in New York or Walter Reade or Bethesda Naval but we could do so much more with the capacity here and the capabilities of the military. Even if only for the time while the Comfort is here? Thank you Mom.

Please keep me posted on

Love

Me
